

Every operator shall be trained in public spa operation and maintenance, filtration systems, water chemistry...

- Ontario Regulation 428/05 -

For over 30 years, Lowry School of Pool & Spa Chemistry has been the trusted choice for pool industry training.

Our close work with Public Health Inspectors across Canada ensures that the course meets all regulation requirements.

Lowry School is perfect for:

- Commercial Pool Operators
- Pool & Spa Service Personnel
- Public Health Inspectors
- Hotel & Motel Staff

“One of the best presented courses I have attended. Content, presentation and range of topics was excellent!”

*Klaus Griese, Director of Property and Facilities
St. Andrews College, Aurora, ON*

Canada's Trusted Resource for Pool & Spa Education

Lowry School courses provide students with detailed information on the chemical workings of recreational water in a simple and straight forward manner.

These two day training sessions will cover topics including:

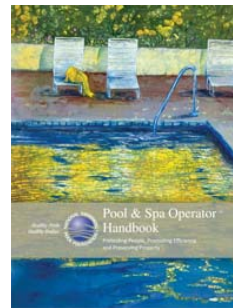

- Province-based pool & spa regulations
- Water balance
- Sanitation and alternative sanitizers
- Water testing and test kit errors
- Recreational water illnesses
- Chemical use and adjusting procedures
- Hot (Spa) Water Chemistry
- Filtration and Circulation

We offer certification in both the Core Water Chemistry (CWC) course and NSPF's Certified Pool Operator® (CPO®) course.

The CWC certification course is 2 days and emphasizes water chemistry providing students with the tools to handle any problem.

The CPO® certification course is 2 ½ days and is designed to provide individuals with the basic knowledge, techniques and skills of pool & spa operations.

Group Training

Lowry School understands that sending large groups to a scheduled course is not always an option. This is why we offer private Core Water Chemistry and CPO courses for groups.
